Course Information	Course of Sociological Theories, Bachelor in Sociology, 8 ECTS, accademic year 2021/2022, 1st Year, 2nd Semester.
Professor Information	Umberto Pagano, PhD, Researcher at Department of Law, Economic and Sociology. Student reception: after lessons or to be agreed upon request via e-mail: umberto.pagano@unicz.it
Course Description	The course aims to introduce students to sociological theory, or rather to some fundamental sociological theories, highlighting their possible interconnections. A brief but exhaustive overview of the theoretical systematization of the Discipline will be presented, from its origins up to the most recent developments, from " <i>grand theories</i> " by "classical" Authors to theories of globalization and postmodernity.
Course objectives and expected learning outcomes	<p>The aim of the course is to frame the historical, scientific and social context in which Sociology was born and evolved, so to analyze the relevant features of the main "classical" and contemporary sociological theories.</p> <p>Knowledge and understanding: Students acquire knowledge of the fundamental theoretical (microsociological and macrosociological) and historical categories of the Discipline, at appropriate level to understand their specificity and "value".</p> <p>Applied knowledge and understanding (i.e., the ability to apply knowledge and understanding): Students are able to interpret and discuss the main sociological theories, to frame them in the historical and social context of reference, to recognize their contribution to the evolution of the Discipline and the links between them. They are also able to consciously argue about them, making appropriate references.</p> <p>Autonomy of judgment: Students develop critical knowledge that allows them to critically and consciously read and analyze the main sociological theories.</p> <p>Communication skills: Students acquire the specific language of sociological theory, the correct use of the categories and lexicon of the Discipline.</p> <p>Learning skills: Students improve their ability to approach sociological reflection and the historical and methodological framework of the most significant exponents of the Discipline.</p>
